

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

1. (original) Improved bath and apparatus therefor comprising an enameled metal or plastic bath body, characterized in that the bath (7) is provided with a pedaling assembly (1) supported by a supporting means (6) which latter forms with said pedaling assembly (1) a pedaling apparatus (8), wherein said pedaling apparatus (8) may be

- either integral with the bath body (7),
- or form a distinct pedaling apparatus (8) which can be removably associated with seats (9) formed in the bath body (7),
- or may form a distinct pedaling apparatus (8) which may be removably associated with the bath body (7) by means of sucker means (13).

2. (original) Improved bath according to claim 1, characterized in that said supporting means integral with the bath body has a box-like or rib-like configuration.

3. (original) Improved bath according to claim 1, characterized in that said supporting means is formed by two uprights.

4. (currently amended) Improved bath according to claim 2 ~~and 3~~, characterized in that said supporting means are provided with cover or an upper bracket.

5. (original) Improved bath according to claim 1, characterized in that said pedaling assembly is a one-piece construction or the components thereof can be removably connected together.

6. (original) Improved bath according to claim 1, characterized in that said pedaling assembly is provided with pedal projecting ends which are covered by a plastic or rubber sleeve and may be inserted in corresponding seats formed in the bath body.

7. (original) Improved bath according to claim 1, characterized in that said pedaling apparatus has a profiled body which may be removably fixed with the bath by means of an intermediate supporting element and/or sucker means.

8. (original) Improved bath according to claim 1, characterized in that said pedaling apparatus has a hollow body housing at the bottom a sucker assembly and at the top a pedaling assembly.

9. (original) Improved bath according to claim 8, characterized in that said sucker assembly is a tightly operating sucker provided with a control lever.

10. (original) Improved bath according to claim 8, characterized in that the pedaling assembly is provided with an adjustable braking shoe for adjusting the pedaling resistance.

11. (currently amended) Improved bath according to claim 3 ~~to 10~~, characterized in that said pedaling apparatus is provided with a programmed chip and a display for showing the pedaling speed, the covered distance, and so on.

12. (original) Improved bath according to claim 1, characterized in that said pedaling apparatus has a mat-like body provided at one end with two opposite flanges for supporting the pedaling assembly.

13. (original) Improved bath according to claim 12, characterized in that on the free end of said mat-like body is provided a saddle-like configuration.

14. (original) Improved bath according to claim 12, characterized

in that the pedaling assembly supporting end is separable from the mat-like body.

15. (original) Improved bath according to claim 1, characterized in that said pedaling assembly is pivotally housed in a box-like supporting means.

16. (original) Improved bath according to claim 1, characterized in that the pedaling apparatus is carried out in the form of a swingable seat.

17. (currently amended) Pedaling apparatus for baths having the features stated in claim 1 ~~the previous claims~~ and provided as a distinct pedaling apparatus.

18. (new) Improved bath according to claim 3, characterized in that said supporting means are provided with cover or an upper bracket.
